MIBB certification course for breast vacuumbiopsies 26th Sep

MIBB Workshop and Symposium 27th Sep

Congress of the Swiss Society of Senology 28th Sep

Dear Colleagues,

This year's upcoming MIBB workgroup event (minimal invasive breast biopsies in Switzerland) will be carried out in conjunction with the Congress of the Swiss Society of Senology in Lugano. The seminar will be split up into a "Newcomer" and "General" course to avoid repetitive training. Hence, the MIBB certification course for breast vacuumbiopsies (introductory course for newcomers) will take place on Wednesday 26th September in a private practice. On Thursday 27th September, the general course is addressed to newcomers as well as to advanced senologists, with a workshop session in the morning providing a greater interactivity compared to the symposium in the afternoon.

As in the last few years, one aim of the MIBB group is not only to allocate training courses in vacuumbiopsies, but also to emphasize on a series of related topics. One major focus of this year's training is set on preoperative planning of the breast and the axilla. This also involves preoperative examinations based on tomosynthesis, how to manage challenging biopsy results as well as questions and answers about repeated vacuum assisted biopsies after neoadjuvant therapy.

I am looking forward to welcoming you to our MIBB events in Lugano.

With cordial regards

Dr. Claudia Kurtz, Presidency of MIBB

The presidents of the entire event in Lugano kindly invite you to an interdisciplinary exchange of knowledge and wish you in this regard a successful attendance.

Dr. Gert Kampmann, Lugano

Dr. Olivia Pagani, Lugano

Kind thanks to our sponsors
